

COVID PRECAUTIONS

Safety is a huge priority for me, and has been always even prior to Covid-19. I want to ease your mind on the steps I take to ensure the upmost sanitation and healthy practices.

I wear an N95 mask when doing your makeup. I use disposable wands for any liquid or cream products. There's NO double dipping in any lipsticks, glosses or creams. I use a disposable palette as well so it's a new one for each client. My brushes are washed and sanitized daily prior to use and after each service. I

have also purchased enough sets of brushes so I don't have to clean in between. So for any larger groups I have enough brushes for each person to have their own set so no one is using anything touched by another client. I alcohol spray anything necessary prior and after use. I Lysol anything touched in between clients. I myself am immune compromised and take the highest safety measures seriously.

I also ask that if anyone has traveled recently they provide a negative covid test, if anyone is sick I have the right to refuse makeup services.

As of April 5, 2021 I will be fully vaccinated.

I take your health and mine very seriously and want to ensure everyone is safe and comfortable.

These are the things I use to ensure proper safety and sanitation.
